## ➤ Contact Form

Approach -

- Create a HTML structure for the contact form component having proper id and classes for the styles.
- Add a CSS file which contains all the styles related to the contact form component.
- Add a JavaScript file having all the logic for validation and boundary checks.
- Form Validations Conditions
  1. Name field should not be empty.
  2. Length of number should be 10 and it contains only numeric value not character.
  3. Email field should not be empty and Email must include @.
  4. Message field should not be empty and Message length must be 5 characters.

## ➤ demo screenshots of contact form -

The screenshot shows a contact form titled "Contact Us" centered on a dark blue background. The form is a white rounded rectangle containing four input fields: "Name", "Email", "Phone", and a larger text area for a message with the placeholder "Enter your message...". A red "Submit" button is located at the bottom of the form.
